
Asme B46 1

b46.1 intro webinar - asme - asme b46.1 - 2009 for the metrologist to establish c and s. these guidelines are intended to include the dominant features of the surface in the measurement whether these surface features are relevant to the function of the surface or not. asme b46.1 2009 - key concepts **surface texture (surface roughness, waviness, and lay)** - asme b46.1-2009 (revision of asme b46.1-2002) surface texture (surface roughness, waviness, and lay) an american national standard three park avenue • new york, ny • 10016 usa **asme b46 - functional stds collection webcast post** - asme b46.1-2009 appendix j functional standards collection • questions on initiative or content? • printed standard vs. real-time list • functional standards collection vs. methods for determining functional correlations - (asme b46 pt32 & pt40) • 'open mike' concept (b46 original!) • b46 pt35 communications initiative **iso vs. asme: the basics of surface profile filtering - bruker** - iso vs. asme - ra example • iso 4287 computes the values over the entire evaluation length (and sometimes computes the values within a sampling length) • iso 4288 and asme b46.1, modifies this computation methodology to include estimates of parameters (computed over one sampling length) versus average value of parameters (computed over all **a n a m e r i c a n n a t i o n a l s t a n d a r d** ... - **asme** - a n a m e r i c a n n a t i o n a l s t a n d a r d surface texture (surface roughness, waviness, and lay) asme b46.1-2002 (revision of asme b46.1-1995) **measuring surface finishes - balseal** - designation, measurement and control of surface texture is ansi b46.1-1978 surface texture standard (formerly asa b46.1-1962). this document standardizes terminology and measurement of the various aspects of surface texture, defines characteristics of stylus instrumentation for measuring **rev. aerospace b standard issued 1996-10 revised 2001-08** - asme b46.1 surface texture (surface roughness, waviness and lay) 3. requirements: 3.1 thread series: the two series of threads recognized by this specification are the standard unj and special unj. the use of standard unj threads shall be given first consideration in the design of new equipment. **surface finish analysis - gagesite** - 400 & up .300 1.5 b46.1-2002 3.3.20 "roughness filter cutoff length is determined in part by the x and z aspects of the surface under evaluation as related to the intended function of the surface. the roughness filter cutoff length should be chosen by the designer in light of the intended function of the surface.
